# Computerized Perforation Sewing Embroidery Machine

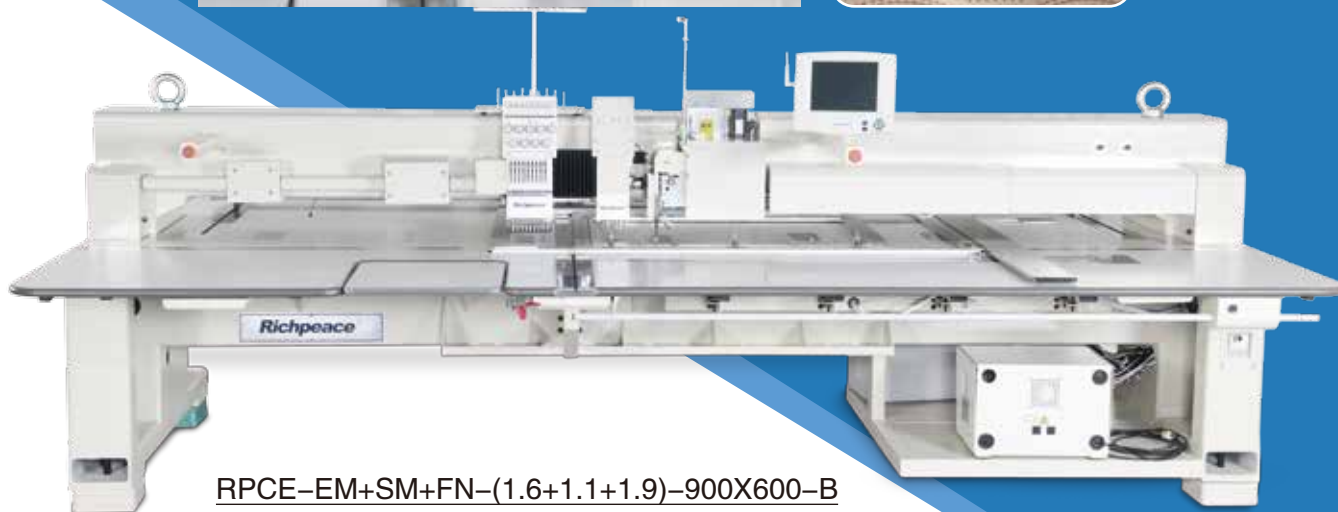

Perforation sewing embroidery—Innovative

**Perforation, sewing embroidery in one process, design freely**

Perforation and embroidery change color control along, combination freely

Embroidery · Perforation · Sewing

**RPCE-EM+SM+FN-(1.6+1.1+1.9)-900X600-B**

- Machine sewing area: 900mmx600mm (other sewing area can be customized);
- Six special punching tools (diameter mm) : 0.8, 1.0, 1.2, 1.5, 2.0, 2.5;
- Use the servo motor for the spindle drive and sewing frame drive, independent control.
- Independent research and development of electromechanical system to satisfy the customer's customization functions;
- Independent develop the software of intelligent perforation, sewing and embroidery sampling. Helpful for working in one process.
- Bridge structure, stable frame, large sewing area, can make any pattern.
- Equipped with automatic vacuum cleaning equipment to remove the scurf;
- Automatic oil supply system, improve the life of the equipment, reduce the manual maintenance;
- The sewing part is using jumbo size shuttle and embroidery part is using the standard size shuttle, import from the Japanese original rotating shuttle;
- The sewing head can be lifted automatically to prevent the collision of the frame and the function of anti-stripping.
- Special multi - function frame, can meet different thickness leather, compound leather processing.

## Applications:

Car leather seats, foot pads, air seats, leather furniture, sports shoes, leather shoes, leather clothing etc.

## Richpeace Group Enterprise Limited

Head Office: Room 503, 5/F, Midas Plaza, 1 Tai Yau Street, San Po Kong, Kowloon, Hong Kong

## Tianjin Richpeace Computer & Machinery Co., Ltd.

Factory: No.6 Baozhong Road, Baodi Economic Development Zone, Tianjin City, 301800 China
